## A. Story introduction

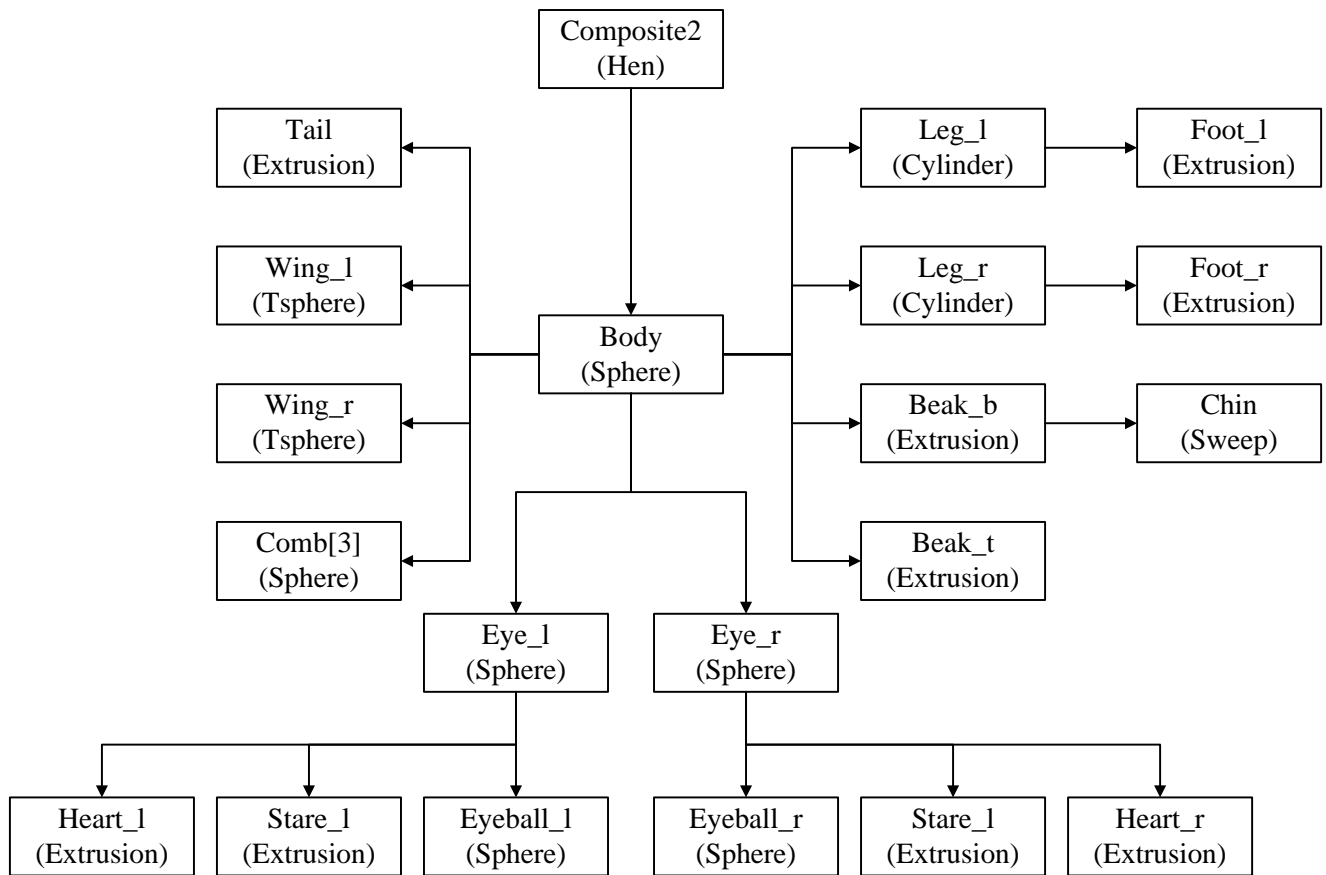

One day, a little elephant was strolling, when he happened to see a hen hatching. After a while a newborn chick broke off. Seeing this the elephant was excited and wanted to try hatching too. So after the hen and chick left, he went on another roost and lay down. Suddenly he heard a cracking sound, and noticing something was wrong, the elephant got up to see what happened. Unfortunately, the egg had been squashed by him. Realizing that he had made mistake, the elephant was worried. The hen was of course furious when she went back, so she stared at elephant angrily.

## B. Animation objects hierarchy model

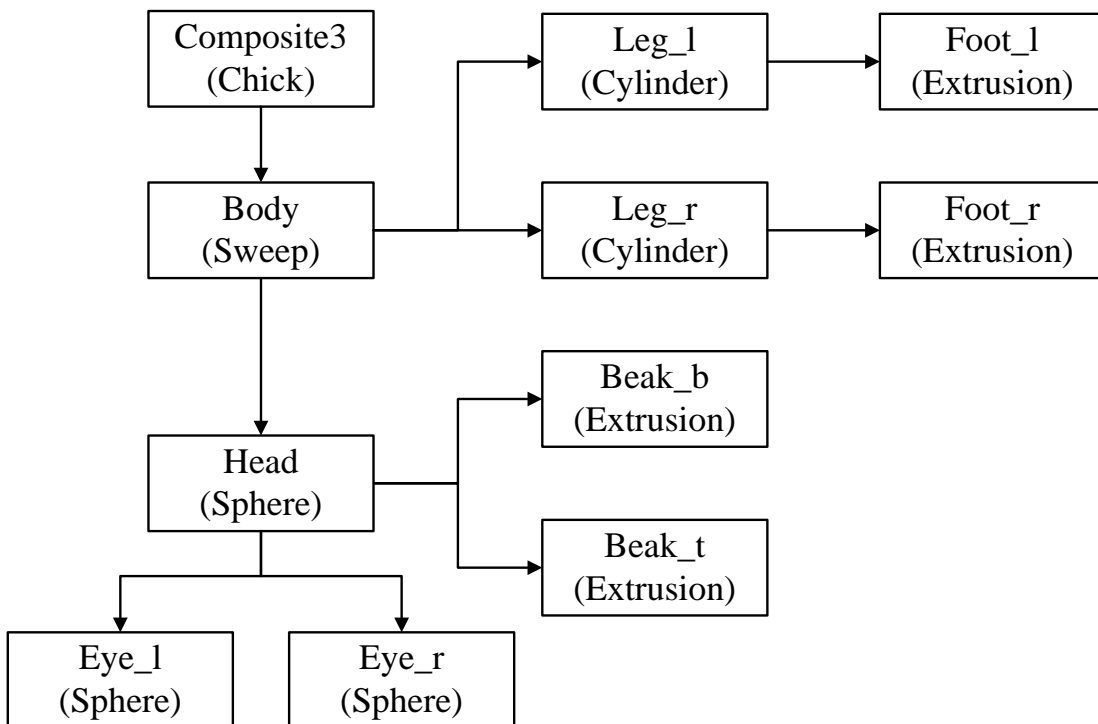

### 1. Composite1 (Elephant)

## 2. Composite1 (Hen)

## 3. Composite1 (Chick)

## C. Animation timeline
